Programme overview

The MSc in International Finance & FinTech has been designed for experienced professionals interested in leading technological advances in the finance industry and trains specialists in the finance industry and financial geopolitics. It has been designed to fill a niche – in the financial industry – and to train business leaders of the future with an emphasis on operational and behavioral issues as well as the strategic location of financial vehicles.

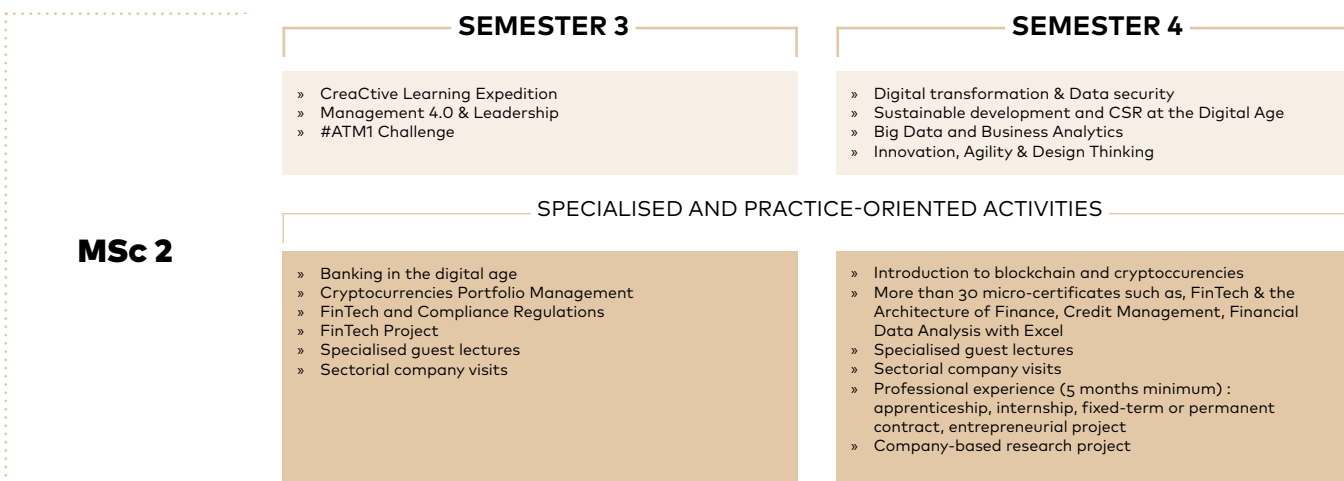

The programme also looks at the interaction between different financial institutions, with a focus on the emergence of Financial Technology (Fintech), Cyber Finance and changes in the decision-maker behavior.

The future of financial transactions, applications and management of finances is expected to be strongly impacted by FinTechs. The understanding of trends and innovations in the financial industry is evidenced by Financial Technology such as crowdfunding, cryptocurrency, and international and mobile payment systems.

Regular Track *The regular track allows you to enter the first year (MSc 1) of the MSc in International Finance and Fintech and to follow the 4 semesters of the programme (MSc 1 and MSc 2)*

Short Track *The short track allows direct entry into the 2nd year of the programme (MSc 2).*

WORK-STUDY FORMAT

Students on the programme can gain industry experience by combining their studies with a work placement as part of an apprenticeship. Doing an apprenticeship can boost your employability and is an excellent way to develop hard and soft skills that are highly valued by employers. Apprenticeships will also allow you to be entirely waived of your tuition fees. The host company also pays you a monthly salary for the duration of the contract according to a scale based on the gross monthly minimum wage. The work-study rhythm will enable you to work part-time in a student-job for 8 to 20 hours per week. This is a great opportunity to expand your skill set. If you have an entrepreneurial mindset, you can also use your free time to build your own project!

CAREER

opportunities

After completing this course, you will understand the different business models and be prepared for employment in a variety of financial sectors: banks, funds, hedge funds, insurance and the strategic consultancy sector.

This programme will prepare you for your professional future and will enable you to develop the skills required by professionals in the sector of international finance and fintech.
