Programme overview

This course has been designed to give you a global and international vision of companies while training you in the multiple facets of logistics, purchasing and supply chain management.

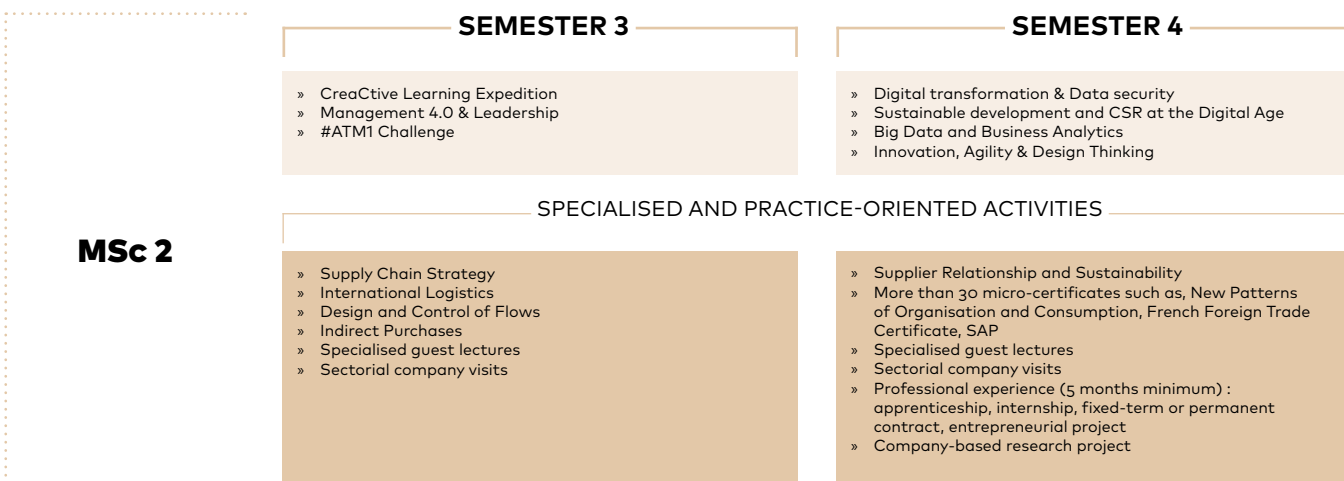

The training program prepares for the management of complex processes (customer/supplier relationships, international operations, industrial and services processes, etc.) encountered by increasingly globalized firms operating in an ultra-competitive environment.

You can join the regular track or the short track of the programme:

Regular Track *The regular track allows you to enter the first year (MSc 1) of the MSc in Supply Chain Management and Purchasing and to follow the 4 semesters of the programme (MSc 1 and MSc 2)*

Short Track *The short track allows direct entry into the 2nd year of the programme (MSc 2).*

WORK-STUDY FORMAT

Students on the programme can gain industry experience by combining their studies with a work placement as part of an apprenticeship. Doing an apprenticeship can boost your employability and is an excellent way to develop hard and soft skills that are highly valued by employers. Apprenticeships will also allow you to be entirely waived of your tuition fees. The host company also pays you a monthly salary for the duration of the contract according to a scale based on the gross monthly minimum wage. The work-study rhythm will enable you to work part-time in a student-job for 8 to 20 hours per week. This is a great opportunity to expand your skill set. If you have an entrepreneurial mindset, you can also use your free time to build your own project!

CAREER

opportunities

This MSc opens opportunities in many sectors of activity: in industry (pharmaceutical, automotive, luxury, food, energy, construction, etc.), in distribution, in the provision of logistics services, but also in consulting. This programme will prepare you for your professional future and will enable you to develop the skills required by professionals in the sector of supply chain management and purchasing.

"I am a buyer of raw materials for Saint-Gobain: I am in charge of negotiating and defining the purchasing strategy for the management of different countries and activities (glass factories, glass wool factories, glass fibre factories, etc.). My years at ICN prepared me well for my professional insertion. In my job, it is essential to know how to adapt to your interlocutor, to understand the cultural specificities of each country and to be flexible: I was able to develop these skills at ICN thanks to the expertise of the professors and the strong international dimension of my course (courses in English and a double Franco-German degree). The ATM (Art Technology Management) workshops prepared me very well for this, as I had the chance to work on group projects with designers and engineers. Finally, if I had to remember one thing from my studies at ICN, it would be the BDS (Bureau des Sports) campaign weeks. This experience taught me what commitment is: you are 100% committed to reach your goal. These are values that are very useful in business and in building one's professional career: once you have a goal in mind, you have to commit fully!"
